All information and prices correct at time of publication, but are subject to change at any time without prior notice (which may occur as a result of matters including, but not limited to, any changes in legislation and/or any changes by the government). Please contact your local Fiat Professional Retailer for the most up-to-date prices and

The fuel consumption or electric range achieved, and CO₂ produced (where applicable), in real world conditions will depend upon a number of factors including, but not limited to: the accessories fitted (pre and post registration); the starting charge of the battery; variations in weather; driving styles and vehicle load. The WLTP (Worldwide Harmonised Light Vehicles Test Procedure) is used to measure fuel consumption, electric range and CO₂ figures. Figures shown are for comparison purposes and should only be compared to the fuel consumption, electric Figures quoted reflect a range of configurations (including non-UK market vehicles) and are subject to changes resulting from ongoing product development, range evolutions, testing and evaluations.

All Manufacturer's Recommended Basic Prices (Basic MRRP) are exclusive of V.A.T., Delivery to Retailer and Number Plates, Government First Registration Fee and Vehicle

Excise Duty.

The Government PiVG is worked out at 35% of the Base Vehicle Price (incl. VAT) and including any discounts applied up to a maximum of £5,000. On-the-road pricing includes number plates and delivery to Retailer exc. VAT and new vehicle first registration fee of £55.00 (correct at time of publication). Excludes fuel and insurance.

Remote control ultrasonic security alarm system		•		•

Dynamic surround view

Incorporates a digital rear view mirror with cameras above the rear door and in the nearside exterior door mirror, extending the view of traditional rear view mirrors.

The system features include:

- Side blind spot detection Enables the driver to clearly see obstacles on the nearside.
- Visiopark 180° rear parking camera Working with 12
 parking sensors enables safer reversing as the driver is now
 able to view a larger area via the digital display screen.
 Automatically activates when reverse gear is engaged or
 the rear doors are opened

The E-Scudo is a battery electric vehicle requiring mains electricity for charging. Range data given has been determined according to WLTP test procedure methodology. The figures shown are intended for comparability purposes only and should only be compared to other cars tested to the same technical standard. The range you achieve under real world driving conditions will depend upon a number of factors, including but not limited to: the accessories fitted (pre and post registration); beginning frequency; personal driving style; vehicle load and route characteristics; variations in weather; heating/air conditioning; pre-conditioning and better the conditioning and standard to the conditioning to the conditioning and standard to the condition and standard to the conditioning and standard to the conditioning and standard to the conditioning and standard to the condition and standard to the conditioning and standar battery condition.
For more information, contact your local Fiat Professional Retailer.

^{*}Requires optional 11kW on board charger.

The fuel consumption or electric range achieved, and CO₂ produced (where applicable), in real world conditions will depend upon a number of factors including, but not limited to: the accessories fitted (pre and post registration); the starting charge of the battery; variations in weather; driving styles and vehicle load.

The WLTP (Worldwide Harmonised Light Vehicles Test Procedure) is used to measure fuel consumption, electric range and CO₂ figures. Figures shown are for comparison purposes and should only be compared to the fuel consumption, electric range and CO₂ values of other cars tested to the same technical standard.

'LOW: Low speed city driving, representative of city centre driving, maximum 35mph. 'HIGH': High speed rural driving, representative of A-road or dual carriageway driving, maximum 60mph. 'COMBINED': A mixed journey average of all elements.

Figures quoted reflect a range of configurations (including non-UK market vehicles) and are subject to changes resulting from ongoing product development, range evolutions, testing and evaluations.

Please note: The EAER, Equivalent All Electric Range, is for business tax calculations only and does not represent the actual range attainable by the vehicle.

CONNECTED SERVICES

MY:ASSISTANT SAFETY AT YOUR FINGERTIPS

Services include Mopar®
Connect Crash Assistance,
available 24 hours a day,
Roadside Assistance support
and Theft Assistance that
can provide GPS coordinates
and will immobilise the
engine when the vehicle
stops to facilitate recovery.

MY:REMOTE CONTROL YOUR CAR FROM A DISTANCE

Finding your vehicle has never been easier. Locate it on the map and follow the fastest route to get there.
You can receive alerts when your vehicle leaves a designated area or if the person driving it is travelling at excessive speed.

MY:CAR KEEP YOUR VEHICLE IN PERFECT CONDITION

Provides up-to-date information about your vehicle such as the fuel level or tyre pressure to ensure that every journey is safe. Check the Vehicle Health Report with useful information and tips on how to take care of it.

MY:JOURNEY TURN YOUR ITINERARIES INTO TRAVEL EXPERIENCES

My:Journey keeps track of car movements and allows you to view trips in a dashboard, add customised notes, merge multiple trips into one, and categorise trips as personal or business; to form a unique travel experience.

MY:eCHARGE MANAGE PUBLIC AND PRIVATE CHARGING

A package which, through the use of dedicated features and mobile apps, allows you to find, use, pay and track recharges at public charging stations (easy Charge), as well as being able to manage charging with a Connected Wallbox.

MY: FLEETMANAGER SIMPLIFY YOUR FLEET MANAGEMENT

my:FleetManager allows you to manage company fleets of cars and light commercial vehicles with maximum efficiency and safety. The most advanced Fleet Management solutions and Car Sharing solutions for car sharing among employees.

Glossary of Terms

Plated weight

The maximum weight to which a vehicle or an axle may be loaded, determined either by the design of the components or by legislation. All commercial vehicles must carry a manufacturer's 'plate' showing the vehicle and axle gross 'plated weights'. It is an offence to drive a vehicle in a condition where any of these weights are exceeded.

Kerb weight

The Minimum Mass minus the driver's weight. When Kerb Weight used, driver weight is included within the Maximum Indicative Payload weight.

Minimum Mass

Minimum Mass ('Mass in running order' on Certificate of Conformity and 'Mass in Service' on V5C form) is defined according to European Type Approval and include all fluids, tools and 90% fuel load/EV battery. It is minimum mass for this variant and does not consider local specification/trim or deletable options (specific to the vehicle). Weights are also subject to manufacturing tolerances (EU Legislation allows 5% tolerance).

Gross Vehicle Weight (GVW)

The total permissible weight of a vehicle including payload and passengers, as shown on the manufacturer's plate.

Gross Combination Weight (GCW)

The maximum permissible weight of a vehicle, including payload and passengers, combined with the total weight of any trailer it is towing. The maximum GCW weight limit is quoted on the vehicle plate and must not be exceeded.

Payload

The total permissible weight that can be carried without exceeding the vehicle's plated weight. Payload does not include driver but does take into consideration specification/trim level:

Weights are also subject to manufacturing tolerances (EU Legislation allows 5% tolerance). Payload does not consider any additional options that a customer may order.

Roof loads

Roof load should not exceed 100kg including the weight of the roof rack/carrier.

Maximum towing weight

The maximum weight of any trailer and its load which may be towed within the limit of the vehicle's plated Gross Combination Weight (GCW). It is based on the ability of the vehicle – at full GCW – to restart on a 12% gradient, which is approximately 1 in 8.3, at sea level. At altitudes above 1500 metres, the engine output may drop with a corresponding reduction in towing capability. It is the operator's responsibility to ensure that the trailer noseweight does not cause the rear axle plated weight of the towing vehicle to be exceeded.

Always fit Fiat Professional towing attachments and accessories available from your Fiat Professional Commercial Vehicle Retailer. They are designed specifically for Fiat Professional models and carry a 12-month warranty.

Commercial Vehicle Categories Differences between M1/N1 and M2/N2 (Vehicles with GVW above 3500kg)

Category M: Passenger carriers

Category N: Goods vehicles

Category N1: Vehicles designed and constructed for the carriage of goods and having a maximum mass not exceeding 3.5 tonnes.

Category N2: Vehicles designed and constructed for the carriage of goods and having a maximum mass exceeding 3.5 tonnes but not exceeding 12 tonnes.

Specific differences, all M2/N2 require the following:

Speed limiter: All M2/N2 vehicles are legally required to be speed limited. M2 to 62mph and N2 to 56mph.

Conversions

Body builders requiring conversion guidance including 2D drawings & 3D CAD should establish an account at www.converters-and-stellantis.com

Fiat Professional FlexCare

EXTENDED CARE PREMIUM Extended Warranty + Roadside Assistance

Offers new car buyers complete peace of mind throughout the duration and mileage of your chosen contract term for worry free driving and maximum coverage, with the additional benefit of roadside assistance.

SERVICE CARE Scheduled Servicing

There's no need to worry about budgeting for your next service. Simply take out a Fiat Professional service care plan. You can then focus on the more important things in life, knowing your servicing costs are taken care of.

myFiatProfessional

Take care of your vehicle with a click! Register now for personalised advice, dedicated tools and exclusive promotions.

BIK Calculator

If you have private use of a company van for more than driving to and from work, you may be taxed on this benefit.

Vehicle Excise Duty

V.E.D. rate for all light goods vehicles registered on or after 1 April 2025 and not exceeding 3,500kg: £345.

Stellantis UK Limited trading as Fiat Professional. Pinley House, 2 Sunbeam Way, Coventry CV3 1ND.
